Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or organization outside the system that sends or receives data, such as Customer, Delivery Agent, and Branch Manager.
Rectangle with numbered header	Process	An activity that processes or transforms data, such as Register Shipment, Track Shipment, Assign Delivery Agent, and Update Delivery Status.
Rectangle (solid fill, no number)	Data Store	A place where system data is stored for later use, such as Shipment Database, Customer Database, Delivery Agent Database, and Delivery Update Database.
Labeled arrow	Data Flow	Shows the movement of data between external entities, processes, and data stores, such as Shipment Details, Tracking Number, Agent Details, and Status Updates.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
