

Code-Layout, Readability and Reusability

Date	29-09-2026
Team ID	SWTID-2026-5359
Project Name	COURIER MANAGEMENT SYSTEM
Maximum Marks	5-MARKS

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	YES	Code and configurations are organized consistently.
2	Proper File Structure	Files and folders are logically organized	YES	Project components are properly organized
3	Meaningful Variable Names	Variables reflect their purpose clearly	YES	Meaningful names are used for fields and components
4	Function / Method Names	Functions are descriptively named	YES	Names clearly represent their purpose
5	Code Comments	Inline and block comments explain logic	YES	Comments are added where necessary
6	Modular Design	Code is split into reusable functions/modules	YES	The system is divided into separate modules and objects.
7	No Redundant Code	Duplicate or unused code is removed	YES	Duplicate or unnecessary code is avoided.
8	Error Handling	Exceptions and errors are handled gracefully	YES	Validation rules help prevent invalid data.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Validation Rules	Validate customer and shipment data	Can be reused for data validation	YES

2	Salesforce Flow	Automatically update shipment status	Reusable for status automation	YES
3	Custom Objects	Store courier-related information	Supports different courier operations	YES
4	Reports	Display shipment and performance data	Can be reused for monitoring	YES
5	Dashboard	Provides visual project information	Useful for management and analysis	YES

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	GOOD	Components are organized systematically.
Readability	GOOD	Names and configurations are easy to understand.
Reusability	GOOD	Flows, validation rules, reports and objects can be reused.
Documentation / Comments	GOOD	Project activities and configurations are documented.
Overall Score	GOOD	The system is structured and maintainable.
