Project Name	COURIER MANAGEMENT SYSTEM
Maximum Marks	5-MARKS

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/nithap652-sys/CMS/issues/views
Programming Language(s)	Salesforce Configuration, SOQL
Framework(s) Used	Salesforce Lightning Platform
Key Features Implemented	Custom Objects, Fields, Relationships, Validation Rules, Flows, Profiles, Roles, Users, Reports and Dashboards
Pending / Incomplete Features	NO
Setup / Run Instructions	Login to Salesforce Developer Org → Open Courier Management System App → Use the required tabs and features.

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	YES
2	Meaningful variable and function names are used	YES
3	Code includes comments / documentation where necessary	YES
4	Error handling is implemented for critical operations	YES
5	The application runs without critical errors	YES
6	Code is committed to a version control repository	NO

Additional Notes / Comments:

The Courier Management System is developed using Salesforce. The system is organized using custom objects, fields, relationships, validation rules, flows, profiles, roles, reports and dashboards. The application was tested to ensure that the major functions work correctly.
